IDENTIFICATION
OF CASE PARTS

PRICE \$5.95

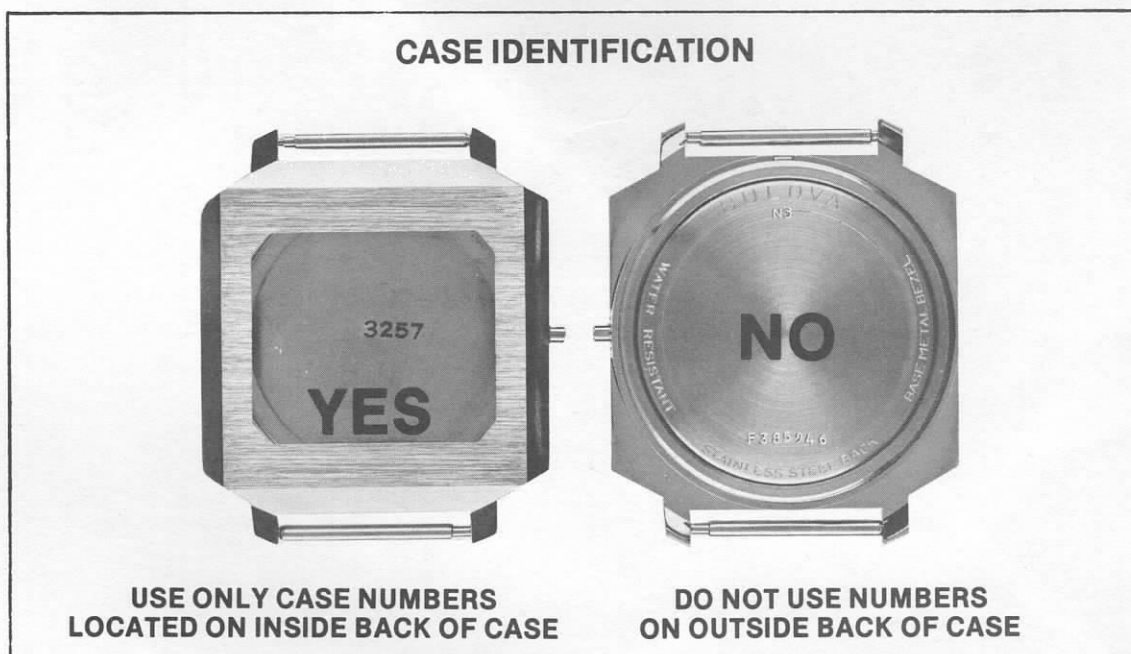

THE KEY TO IDENTIFICATION OF ACCUTRON, BULOVA, AND CARAVELLE CASES

Accutron, Bulova and Caravelle Cases can be identified by their Case Reference Numbers located only on the inside back of the case*.

Case reference numbers are either die-struck (engraved look), or imprinted with heat resistant ink on the inside back of the cases.

If the case to be identified is part of an assembled watch, the hidden case number can only be determined by opening the case. Each case type requires its own procedure. A screwback case needs only its back removed, whereas a two-piece dress case requires the removal of both its bezel and movement. Regardless of the construction of the case, **the case reference number is located on the inside back of the case.**

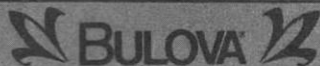

*There are a very small number of old unnumbered cases which are still in the field. If you receive one, and can't identify it properly, forward it on to the Case Department, 75-20 Astoria Blvd., Jackson Hts., N.Y. 11370.

CASE REFERENCES MAY APPEAR ON THE OUTSIDE BACK OF WATCHES PRODUCED AND DISTRIBUTED OUTSIDE THE U.S.A.

Perma-Lite

Perma-Lite is a feature which provides a clear digital display under all light conditions without pushing buttons.

SPECIAL INSTRUCTIONS ON PERMALITE CASE PARTS

Because of the special construction of this type of watch, servicing—even the removal of the module from the case—must be done with specialized equipment under factory controlled conditions.

Consequently not all case parts are available for sales and distribution. THOSE PARTS WHICH ARE AVAILABLE ARE LISTED BY PART NUMBER IN THE SUPPLEMENT. ALSO AVAILABLE ARE POWER CELLS, POWER CELL STRAPS (IF SEPARABLE) AND CASE BACKS.

For all other replacements send *complete watch* to:
